

K.D.S. CONSTRUCTION COMPANY LTD
CIVIL ENGINEERING

ENVIRONMENTAL POLICY

KDS Construction carry out Civil Engineering works and building works, of which a large proportion is with clients involved in heavy industry, particularly steel & chemicals. It is our intention to continually improve our environmental performance by reducing the environmental impact arising from our activities, which are carried out, on the client's premises.

We will:

- ❖ Comply with, or improve upon relevant legislative regulatory requirements
- ❖ Set objectives and targets and publish our achievements
- ❖ Reduce the use of product types and methods with the potential to have an adverse effect on the environment
- ❖ Where environmentally sympathetic materials and methods are not available or cannot be used, the company will ensure optimum containment and filtration
- ❖ Utilise noise suppressed mobile plant and provide full protection from potential environmental damage by fuel leakage
- ❖ Continue to dispose of waste in accordance with duty of care requirements, whilst seeking to reduce solid waste by adopting alternative methods
- ❖ Conduct regular audits to ensure compliance with the companies policies and legislation
- ❖ Provide staff awareness training
- ❖ Communicate the companies environmental policy to staff and the public and report improvements on a regular basis
